

Australia's Largest and Fastest
National **Mobile** Network.

CDMA is going away.
Make the move to the **Next G™**
network now.
Geordie Gill is glad he did.

“We help move the nation’s rubbish. And the **Next G™** network is helping us move ahead of the competition.”

Geordie Gill, Managing Director, 1300RUBBISH, Australia.

“We’re Australia’s largest rubbish removal company. Since switching from CDMA, we’ve seen a dramatic increase in data transfer speeds, helping us halve the time it takes to process job details, quotations and credit card transfers. The **Next G™** network also gives us the coverage we need to help our business stay connected across the country. Now we’re able to expand into new areas and offer more 1300RUBBISH franchise opportunities. I’d say that the **Next G™** network is crucial to our ongoing success.”

Make the move to the Next G™ network at your local Telstra Shop or Dealer today.
